RAMSEY, N.J. (PR WEB) September 9, 2007-- *TeleWRITER* Corporation, Ramsey, NJ, announced today they have successfully completed development and testing of their new Microsoft Vista® Compatible version of **TeleWRITER® Advanced Graphics System (TW-AGS)**. The new Version 4 of **TW-AGS** completed compatibility and QC testing with current Version 3.0 and will be ready to begin shipments beginning early October.

TeleWRITER-AGS (Advanced Graphics System) software is the oldest and most comprehensive audio/graphic software available today. Clients use the product to capture, store, transmit, retrieve and annotate high resolution graphics, text or paused video images, in real-time, allowing them to easily switch between an interactive mode to application sharing/collaboration for the shared use of most software applications, all over IP networks and the Internet.

The new **TeleWRITER-AGS** Ver. 4.0 retains all features and functions currently in Ver. 3.0 including the powerful Multimedia Authoring tool and Digital Streaming Recorder to enable recording the meeting proceedings. The new software senses the resident operating system on the target PC and installs accordingly. All versions of Version 3 and the new Version 4.0 can be active on up to 32 PC's in a mixed full collaborative audio graphic WEB conference. Additionally the software continues to provide PC graphics for the Ericson ViPr Series codecs. The ViPr optimized version is available only through authorized Ericsson Video Product resellers.

The first public demonstrations of **TW-AGS** Ver. 4.0 shall be October 2nd, 3rd and 4th at the Court Technology Conference (CTC-10) in Tampa, Florida and at the Middle Atlantic Association for Court Management (MAACM) in Virginia Beach, VA, October 15, 16 and 17. "In recent years *TeleWRITER* has been embraced by the Courts and legal profession for process automation of First Appearance, Arraignment, Depositions, Juvenile Hearings, etc." said Carl Ceragno, President of *TeleWRITER* Corporation, continuing, "It's only fitting that the new version be first introduced at two major Court Conferences and Exhibitions".

About *TeleWRITER* Corporation, Inc
TeleWRITER Corporation, Inc. is a privately held Collaborative Computing, Whiteboarding and Web Conferencing company since 1999. The **TeleWRITER** System was originally launched in 1982, and has garnered awards as, Best of Show at TechLearn, Las Vegas, NV in the category of Web Conferencing and Computing Collaboration. The software provides the ability to connect up to 32 PC's over an IP or Internet connection without the need for a server, reoccurring use and monthly charges, for a low, one time license fee for the software.

For more information or to request a free demo CD of the new Version 4.0 for PC XT or Vista operating systems, go to their WEB site at <http://www.telewriterags.com> or call *TeleWRITER* Sales and Marketing, Hampton, Virginia, at 757 722-0054 or E-mail sales@telewriterags.com
