TeleWRITER AGS

- Your tool for
- Distance Education
 - Software Training
 - Document Conferencing
 - Tech Support
 - Mfg./Design
 - Presentations
 - CME
 - Telemedicine
 - Tech Training

Snap an image, shape a phrase, share an application.

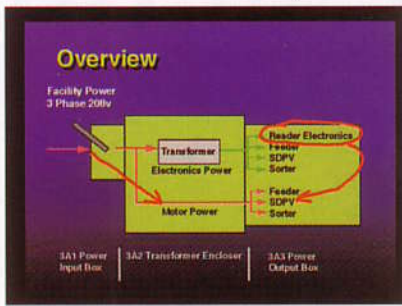

For projects that spring from many minds in many places, you need the Telewriter. Telewriter/AGS links your PC with one or many others, letting you write, draw, photograph, scan, annotate, store and collaborate. Whether you work in numbers, words or images, get real-time interaction. Transform your PC into a powerful teamwork tool!

Capture the possibilities today.

TeleWRITER AGS

**INTERACTIVE
COLLABORATIVE
MULTIMEDIA**

Interactive

Telewriter/AGS is a T.120 based conferencing software. Conferees can capture, store, transmit, retrieve and annotate high resolution graphics, text or video images in real-time. Telewriter/AGS allows users to easily switch from an interactive mode to application sharing/collaboration for the joint running of most software applications.

Collaborative

Telewriter/AGS features whiteboards, graphic slide shows, high resolution video imaging, document scanning and multimedia video control. This wide variety of graphical media is easily incorporated and managed by a simple icon based tool bar.

Multimedia

Telewriter/AGS communicates over standard telephone lines, LANS/WANS and the Internet. The TCP/IP functionality of the software makes TELEWRITER compatible with any network configuration. Multipoint conferencing at high speeds is easily achieved with a T.120 Network Server Software.

Telewriter AGS. Capture the possibilities today.

Real-Time Interactive

TW/AGS includes multiple annotation tools for real-time interactivity all easily accessed from a toolbar.

- Multiple colors
- Erase/Undo
- Magnify +/-
- Geometrics
- Pointer/Cursor
- Line Widths
- Text/Fonts
- Highlighter

Multimedia

- White Board
- PC Graphics
- Slide Shows
- Spread Sheets
- Still Frame Video
- Audio Clips
- Text Memos
- Documents

Application Sharing/Collaboration

Launch software applications, share the screens and/or control with other conferees.

Collaboration

Collaborative Computing is easily launched from the TW/AGS toolbar. Upon launching the application TW/AGS software will automatically be minimized.

Multimedia Video

Start, stop, fast forward and annotate resident AVI/MPEG multimedia video clips on your CD-ROM and at remote sites. Adds motion video to meeting or class and links them to your graphic presentation on-line.

File Management

- Delete/Copy/Compress
- File Transfer
- Create/Change Directories
- Multiple File Formats
- Thumb Sketch Directory

PC Requirements

- Pentium PC
- 64 MEG RAM
- Windows 98 or XP
- SVGA
- Sound Card
